

Roadtrip to Madison, Wisconsin

EVS 248 Environmental Geology and Hydrology

Fall Semester

Today's lab focuses on going From Dubuque to Madison, Wisconsin. For this lab, taking photos and uploading them to Moodle will be sufficient.

- Our first stop is Blue Mound Stat Park. From the towers there, we will have an excellent view of the Driftless Zone.
- Our second stop is Prairie Moraine County Park, near Verona, WI. This is our first clear encounter with Wisconsinin glaciation.
- Our last stop is Famous Dave's. Good barbecue. Bring \$15 or see me ahead of time if this is a burden.

For those who are unable to go on the field trip, your assignment is to find a good vantage point of the Driftless Zone. If you can't visit one, use Google Earth to construct one. Upload to Moodle annotated photos or images.
