

# Midterm Laboratory Exam Review

## ESC 115 Physical Geology

### Labs 1–6

1. Identify the main geologic influences on Dubuque, including minerals, glaciation, and the river.
  2. Read a topographic map, determining latitude, longitude, contour interval, and main features,
  3. Determine relative age of sedimentary rocks,
  4. Calculate a topographic gradient, given a contour map, and
  5. Identify the following minerals without a key,  
giving your reasoning:
6. Identify the following igneous rocks:
- |  |   |
|--|---|
| <ul style="list-style-type: none"><li>• calcite</li><li>• feldspar</li><li>• galena</li><li>• graphite</li><li>• gypsum</li><li>• halite</li><li>• hematite</li><li>• magnetite</li><li>• malachite</li><li>• mica</li><li>• pyrite</li><li>• quartz</li></ul> | <ul style="list-style-type: none"><li>• pumice</li><li>• obsidian</li><li>• rhyolite</li><li>• granite</li><li>• andesite</li><li>• diorite</li><li>• basalt</li><li>• gabbro</li></ul> |
|--|---|
7. Identify the following sedimentary rocks:
- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• shale</li><li>• sandstone</li><li>• conglomerate</li><li>• breccia</li><li>• limestone</li></ul> |  |
|--|--|
8. Identify the following metamorphic rocks:
- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• gneiss</li><li>• schist</li><li>• slate</li><li>• marble</li><li>• quartzite</li></ul> |  |
|--|--|
